

This is the amount you can comfortably spend today. It's the accumulation of the money left until today.

This graphs shows you how much you will have in two days. Every day you get one daily budget added to your balance.

Tap here to enter an irregular income, like occasional eBay sales.

Tap here to enter a spending.

This is your daily budget. It is calculated as: $(\text{Income} - \text{Recurring spendings} - \text{Saving}) / \text{number of days in a month}$

This is for regular income, like salary or allowance.

Recurring bills are meant for rent, insurance, gym fee- ones you pay the same amount every month.

Enter how much you want to put-away from your income for saving.
